Simacore.Q: Paragraph gets converted to pre when printing RTF document I am using System.IO.Packaging for converting a RTF file to PDF. It works, but the exported PDF has unwanted extra formatting, when printed. The PDF Header says: "PK 25 dict" and in the body of the text there are random characters between and tags, as well as the tags. The pre tag does not contain any styling, so I'm sure that it is not the problem. I've been looking for a solution for hours and I 3e33713323
