The Electronic Lab Book is a fully functional, easy to use, and free software application that contains all of the information you will need to use and run the GC/MS. The Electronic Lab Book also contains a complete set of reference tables for over 4,500 different compounds. This free Electronic Lab Book, like the integrated ChemStation/1D software, is a powerful tool for entry and analysis of GC/MS data. Like ChemStation, the Electronic Lab Book is a powerful, stand-alone GC/MS software package for the professional and the hobbyist alike. Features Complete chemical analysis package Uses Web Table of Integrations (WTIs), such as GC-Wax columns and automatic wax confirmation Take the simple task of integrating GC-MS data from ChemStation and make it easier Calculates accurate molecular weight with complete calculation of molecular structure Automatically determine molecular formula with a confirmation required Compounds are classified according to their structure Classification can be performed in a recursive manner (small structures with the same structure are also classified) Searches databases of physiochemical and structure properties Generates output for bubble chart and PDA (Multichannel GC/MS) in ASCII format Easy to use and powerful GC/MS software package for the ChemStation-enabled GC/MS Detects compounds in unknown samples Cheatsheet Complete Chemical Analysis Package The Electronic Lab Book is a fully functional, easy to use, and free software application that contains all of the information you will need to use and run the GC/MS. Abscissatron is an unmatched equation solver. Abscissatron was also designed as a great polynomial equation manager that will also allow you to enter input data from the program or from files and to copy and save all output. Don't forget to register the software for free to receive support and updates. RipworX is a simple application designed to protect the media files. It will, first of all, rip the files, and then, after processing it, will save them to the desired folder. The software is non-tangible because the files will be saved in either a temporary folder or the one where you want to place them.
