How to add some text (or line) in a google map for every address in a sheet. Hotel List on Map How to place a map of a certain area on a google map and have multiple links to different places in that area. A: The best way to get this done is to use the Google Sheets API (I strongly recommend it). One of the easiest tasks to achieve with this would be to create a simple script that loops through the range A1:A25 and gets the email addresses and places them on a map in the same row as the email address.
