Field of the Invention This invention is related to a positioning control apparatus of a brushless motor, and particularly to a positioning control apparatus of a brushless motor capable of eliminating torsion in a brushless motor having six brushless motors. 2. Description of the Prior Art With recent development of industry, industry demands are increasing for electric products with less weight and less power consumption. Besides the above requirements, requirement for equipment with smaller, lighter weight and higher resistance to vibration is increasing. In order to meet the above requirements, a brushless motor, especially a brushless motor having six brushless motors, is applied to a variety of electric products. Please refer to FIG. 1. FIG. 1 is a schematic view illustrating a positioning control apparatus of a brushless motor having six brushless motors. FIG. 1 illustrates a brushless motor 1 having six brushless motors 14, 15, 16, 17, 18, and 19. The brushless motor 1 having six brushless motors 14, 15, 16, 17, 18, and 19 includes a coil 10, six motor coils 11, 12
